BIOLOGY: #13 (Revised 11/04)
SUBJECT: Michigan Plant List
DATE: November 23, 2004

MICHIGAN PLANT LIST

Following are two Michigan Plant Lists for your use and as a reference.

The first list, entitled "Michigan Common Plant List," is sorted alphabetically by common name. The list includes the plant's common name, scientific name, physiology or growth form, Wetland indicator status, and Coefficient of Conservatism. This list is very useful when conducting wetland determinations. The list is extracted from the Michidex database and only includes the more common plants of Michigan.

The second list, entitled "Michigan Plants Database - 2001" is the complete Michidex database sorted alphabetically by scientific name.

For further information about these lists or to find information regarding plants which are not on these lists, contact the State Biologist.

KEVIN J. WICKEY
Assistant State Conservationist-Technology

MICHIGAN COMMON PLANT LIST

This is a list of the more common plants of Michigan. This list is extracted from the MICHIDEX data base. For a complete listing, refer to the MICHIDEX data base. When using the "Physiolog" column, "N" indicates Native to Michigan while "A" indicates alien or introduced. The WETNESS column lists the plant's Wetland Indicator Status. Status ranges from Obligate Wetland to Upland. The "C of C" column indicates the plant's "Coefficient of Conservatism." This implies the extent to which the plant is found in stable systems. For example, a rating of 10 indicates that the plant is usually found in a pristine or undisturbed situation while a 0 or 1 indicates a pioneer species. An "*" means alien species.

COMMON NAME	SCIENTIFIC NAME	PHYSIOG.	WETNESS	C of C
ADDER'S-MOUTH,GREEN	Malaxis unifolia	N Forb	FAC	8
ADDER'S-TONGUE,SOUTHERN	Ophioglossum vulgatum <T>	N Fern	[UPL]	10
ALDER,EUROPEAN OR BLACK	ALNUS GLUTINOSA	A Tree	FACW-	*
ALDER,GREEN	Alnus crispa	N Shrub	FAC	10

APPENDIX C

MICHIGAN PLANTS DATABASE - 2001

Compiled by:

M. R. Penskar, A. A. Reznicek, W. W. Brodovich, G. S. Wilhelm, L. A. Masters, K. D. Herman, and K. P. Gardiner.

This state flora database was developed for use with the Floristic Quality Assessment system for the State of Michigan for which the application is discussed in the main body of this publication. Although the list is quite comprehensive, it represents a **utility database only** and should not be considered a state flora treatment. The list was compiled by consulting several floristic and taxonomic sources, and also represents our collective field knowledge and taxonomic judgment for numerous taxa. Because the list was prepared in this way, it cannot be fully reconciled with treatments prepared by such floristicians as Voss (1996, 1985, 1972), Gleason & Cronquist (1991), or others. It is anticipated that the list will be periodically updated to incorporate information on new taxa identified for Michigan and to adopt contemporary nomenclature where we feel it is appropriate. Questions or comments about this database and its compilation can be directed primarily to M. R. Penskar and A. A. Reznicek.

This database is sorted alphabetically by scientific name.

KEY

ACRONYM = Six digit reference code for each taxa
C = Coefficient of conservatism
***** = Adventive taxa [defaults to 0 (zero) in the 2000 FQA Computer Program]
ST = Status as recognized by the State of MI
X = Extirpated
E = Endangered
T = Threatened
SC = Special concern

W = Wetness coefficient
WET = Michigan wetland categories
[ ] = Assigned for Michigan

PHYS = Physiognomy
AD = Adventive taxa
NT = Native taxa
A = Annual
B = Biennial
P = Perennial
