

2010 CULTURAL RESOURCES UNDERTAKING REVIEW FORM

It has been revised taking into account the many suggestions that have been made since the last revision.

Thanks for all your comments.

It is basically the same, but more user-friendly. The type font is larger; there is more space for typing into, more Programs added, and better wording.

You are encouraged to start using it NOW

The List of **Programs** in #3 is embedded in the **Dark Blue** column. To us this:

Click on the **Dark Blue** box once to show the little scroll arrows on the far right side. These arrows are small and it does take precise mouse movements, but it does work.

Then Point and Click either the little or buttons until the Program you want is showing in **White**

Then click on that Program's name to lock it in place.

It will change from **White** to **Dark Blue**.

Whenever the **Planner** is different from the person who sends the form to me, please put your name as **Submitter** at the top. That way I will be able to search my email to find your submissions.

Submit *one farm per email* and put the County Name and Farm Number in the subject line.

Please make all **topographic** maps on the scale of **1:10,000** and clearly label the **exact** location of **each** proposed practice.

Thank you for contributing to the preservation and conservation of our cultural resources. This is important work because these resources are not renewable; and once they are gone, their information is lost forever.

Please email or call Don if you have any questions
