Field Border Layout (FOR EXACT LOCATION SEE JOB SKETCH)	FIELD BORDER 1	FIELD BORDER 2	FIELD BORDER 3
Border width (ft)			
Border length along edge of field (ft)			
Area (ac)			
Slope (%)			
Species #1			
Species #2			
Species #3			
Species #4			
Seeding rate (Lbs/ac PLS)			
Fertilization N (lb/ac) P^2O^2 (lb/ac) K^2O (lb/ac)			

SITE PREPARATION
Prepare firm seedbed. Apply fertilizer according to recommendations.
PLANTING METHODS
Drill grass/legume seed no more than 3/8 inch deep uniformly over area. Establish stand of vegetation according to recommended seeding rate. If necessary, mulch newly seeded area with _____tons per acre of mulch material. If a companion crop is necessary apply at _____pounds per acre. Clip companion crop or harvest before it head out.
MAINTENANCE
Maintain original width and depth of the grass area. Harvest, mow, reseed, and fertilize to maintain plant density, vigorous plant growth, and to remove plant nutrients. Inspect after major storms, remove trapped sediment, and repair any eroding areas. Shut off pesticide sprayers when turning on a field border.

Additional Specifications and Notes:

CERTIFICATION: Attach WY-ECS-25 Seeding Plan

I hereby certify that this practice has been installed in accordance with NRCS standards and specifications.
