SITE SPECIFIC PRACTICE EFFECTS WORKSHEET FOR NON-IRRIGATED PASTURE & HAYLAND, NUMBER 3:

TECHNICAL GUIDE - SECTION III
FIELD OFFICE _____
DATE _____

RESOURCE SETTING: MLRA 58B, sandy loam to silt loam soils, windy springs, severe thunderstorms prevalent, private ownership.

PROBLEM IDENTIFICATION: Low forage production; poor species selection, lack of adequate livestock water facilites; poor wildlife habitat.

RESOURCE PROBLEMS/ASPECTS

RESOURCE MANAGEMENT SYSTEM (RMS) GUIDE SHEET FOR PASTURE & HAYLAND, NUMBER 3:

TECHNICAL GUIDE - SECTION III
FIELD OFFICE _____
DATE _____

RESOURCE SETTING: MLRA 58B, sandy loam to silt loam soils, windy springs, severe thunderstorms prevalent, private ownership.

CURRENT SITUATION: Cool season bunch grass, primarily grazed; occasionally hayed. Wildlife habitat rating <.4. No known unique local cultural values; Operator goals include sustained livestock production with reasonable economic returns and sustained resources for continued family lifestyle.

PROBLEM IDENT: Low forage production; poor species selection, lack of adequate livestock water facilites; poor wildlife habitat.

RESOURCE PROBLEMS/ASPECTS
