United States Department of Agriculture

# Local ImportantFarmland

for

Town of Chester, Connecticut

The Town of Chester, Connecticut, has concern for certain additional farmlands for production of food, feed, fiber, and forage, even though these lands are not identified as having national or statewide importance. According to the Code of Federal Regulations, title 7 part 657, these lands have been identified by the local agency concerned as ***Local Important Farmland*** and approved by the signatories below.

| Map Symbol | Soil Name |
|---|---|
| 46B | Woodbridge fine sandy loam, 2 to 8 percent slopes, very stony |
| 51B | Sutton fine sandy loam, 2 to 8 percent slopes, very stony |
| 61B | Canton and Charlton soils, 3 to 8 percent slopes, very stony |
| 61C | Canton and Charlton soils, 8 to 15 percent slopes, very stony |
| 73C | Charlton-Chatfield complex, 3 to 15 percent slopes, very rocky |
| 85B | Paxton and Montauk fine sandy loams, 3 to 8 percent slopes, very stony |
| 85C | Paxton and Montauk fine sandy loams, 8 to 15 percent slopes, very stony |

The undersigned hereby designate the above named soil mapunits as ***Local Important Farmland*** soils and officially add these soils to the list of Prime and Statewide Important Farmland soils for the Town of Chester, Connecticut.
