Acknowledgements

This project would not have been possible without funding from the United States Department of Agriculture, Natural Resources Conservation Service, Conservation Innovation Grant Program. We thank them for their support.

A number of people contributed time and expertise to this project. Whether they are research and extension personnel, graduate students or interns at North Carolina State University and North Carolina Agriculture & Technical University, hog farmers, or staff at the NC Department of Agriculture & Consumer Services, their contributions were of critical importance. We thank the following individuals: Dr. Nancy Creamer, Dr. Morgan Morrow, Dr. Ronney Vibart, Dr. Geoff Benson, Dr. Charles Rackcowsky, Dr. Niki Withley, Dr. Julie Grossman, Dr. Deanna Osmond, Dr. Jeffrey White, Dr. Oh Sang Hyon, Dr. Consuelo Arellano, Dr. Matt Poore, Dr. Jean-Marie Luginbuhl, Lawrence Elworth, Tim Holmes, Bart Renner, Heather Glennon, Renee and Randall Parker, Bailey Newton, Sandra and Jeff Garner, Genell Garner, Christine and Michael Underwood, Lee Haywood, Domisty Menius, Andrew Meier, Marty Dudley, Brad Hardison, Jason Talton, Brian Hester, Steven Stewart, Juan Carlos Guevara, Carolina Vix, Roberto Franco, Jorge Cardona, Walter Maradiaga, Arlin Lobo, Ariel Zelaya, Vanessa Guifarro, Adeia Nevels, Gabriella Minchiotti, Elizabeth Noblet, Catherine May and Deanna Goldner.

Table of Contents

I. Purpose 1

II. Introduction 2

III. Approach & Methods 3

IV. Findings & Recommended Practices 5

V. Research Trials 18

VI. On-Farm Demonstration Profiles 31

Triple B Farm 34

Parker Farm 45

VII. Summary and Future Research Needs 54

IX Appendices 56

Appendix A: Student Contributions 57

Appendix B: Papers and Peer Reviewed Abstracts 58

Appendix C: Crop Species and Their Primary Season of Growth and Use by Hogs 60

Appendix D: Schematic for Rotational Management System 61
