Residue Management, Reduced Till (345) Worksheet

Cooperator:		**Field Office:**	
Plan No.:			
Location:		**Date:**	
Field No.:			

Practice Purpose (check all that apply)	
	Reduce sheet, rill, and wind erosion
	Reduce tillage-induced particulate emissions
	Maintain or increase soil quality and organic matter content
	Reduce energy use
	Increase plant-available moisture
	Provide food and escape cover for wildlife (329 only)

	Tract and/or Field					
Site Information	**1)**	**2)**	**3)**	**4)**	**5)**	**6)**
Planned Acres						
Applied Acres						
Previous Crop/lbs of residue						
Current Crop						
Residue Ht (if applicable for specific purpose of Increasing Plant Available Moisture)						

Attach RUSLE2 Profile or WEPS printouts which show, crop rotation, types of equipment, residue amounts after harvest and seeding, and STIR and SCI ratings. Also document plan maps with acres and date of certification

Additional Certification Information: Minimum and maxium STIR or SCI requirements for specific fields to meet specific purpose criteria, any disturbace done or required for management, etc.

I certify that this practice has been carried out as documented and meets standards and specifications.
