**OPERATION AND MAINTENANCE ITEMS**

The new, replacement, or retrofit combustion system and related components or devices shall be operated and maintained in accordance with the manufacturer's recommendations. Estimated life span of this installation is at least 15 years. Records are recommended to be retained and updated for a minimum of five years from the beginning of operation of a new, replacement, or retrofitted combustion system. The recommended records to be retained are as follows:

- Total hours operated.
- Types and amounts of fuel used in the combustion system(s), or electricity used for electric motors that have replaced an existing combustion system.
- Documentation of maintenance conducted on the new, replacement, or retrofitted combustion system and related components or devices.
- Additional Operation and Maintenance Requirements Specific to this Plan: \_\_\_\_\_
