Conservation Planner or Technical Service Provider (TSP) <sup>4</sup>	Signature _____ Date _____	Signature _____ Date _____
Producer <sup>5</sup>	Signature _____ Date _____	Signature _____ Date _____

<sup>1</sup>Treatment Method(s) include(s) specific treatment methods, sequences of measures such as:

- Prescribed burning (refer to Conservation Practice 338, Prescribed Burning) must have an approved plan developed on Form KS-ECS-338, Prescribed Burn.
- Mechanical (mowing, disking, cutting, etc.)
- Herbicide treatments (refer to the current Chemical Weed Control for Field Crops, Pastures, Rangeland, and Non-cropland Guide, published by Kansas State University (KSU).
- Targeted grazing (refer to Conservation Practice 528, Prescribed Grazing.)

<sup>2</sup>Specific herbicide rates and other details (refer to the current Chemical Weed Control for Field Crops, Pastures, Rangeland, and Non-cropland Guide, published by KSU. The Natural Resources Conservation Service (NRCS) does not endorse one product over another. All laws, rules, and regulations related to herbicide use must be followed.

<sup>3</sup>Windows/Pesticide Screening Tool (Win/PST) results and mitigation for loss potential.

<sup>4</sup>For planning and application, conservation planner or TSP is verifying the design and application of the practice meets Kansas conservation practice standards and construction specifications.

<sup>5</sup>For planning, producer acknowledges that the design of the conservation practice has been discussed with them, they concur with the design, and that no changes are allowed without the approval of the TSP. For application, the producer is certifying that the practice has been applied as designed.
