

STATEMENT OF WORK

Fuel Break (383)

These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.

DESIGN

Deliverables:

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices
 - a. Practice purpose(s) as identified in the conservation plan.
 - b. List of required permits to be obtained by the client
 - c. Compliance with NRCS national and state utility safety policy (NEM part 503-Safety, Section 503.00 through 503.22)
 - d. List all required and/or facilitating practices
 - e. Practice standard criteria-related computations and analyses to develop plans and specifications including but not limited to:
 - i. Fuel break width and length; density of residual trees.
 - ii. Vegetative species selection for residual herbaceous and woody plants.
 - iii. Erosion calculations
 - iv. Mitigation measures to reduce wildfire and pest hazards, control erosion, runoff, soil compaction and soil displacement to acceptable levels
2. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describes the requirements to install the practice and obtain necessary permits.
3. Operation and maintenance plan
4. Certification that the design meets practice standard criteria and comply with applicable laws and regulations
5. Design modifications during installation as required

INSTALLATION

Deliverables

1. Pre-installation conference with client
2. Verification that client has obtained required permits
3. Staking, layout, and tree marking (if necessary) according to plans and specifications including applicable layout notes
4. Installation guidance as needed
5. Facilitate and implement required design modifications with client and original designer
6. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during application
7. Certification that the installation process and materials meets design and permit requirements

CHECK OUT

Deliverables

1. Records of installation
 - a. Extent of practice units applied.
 - b. Actual mitigation measures applied
2. Certification that the installation meets NRCS standards and specifications and is in compliance with permits
3. Exit conference with client to ensure understanding of the need for continual treatment to maintain intended function of practice
4. Progress reporting
