

STATEMENT OF WORK Residue and Tillage Management – No Till (329) Vermont

These deliverables apply to this individual practice. For deliverables for other planned practices, refer to those specific Statements of Work.

DESIGN

Deliverables

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices
 - a. Practice purpose(s) are identified and are compatible with the conservation plan.
 - b. Practice standard criteria-related computations and analyses to develop plans, specifications and operation and maintenance plan including but not limited to:
 - i. Results of NRCS erosion prediction tools or equivalent, and other applicable technical tools to address targeted criteria
 - ii. Planned residue amount
 - iii. Orientation of residue
 - iv. Distribution of residue
 - v. Timing of planting
 - vi. Other requirements of the conservation practice standard Residue and Tillage Management, No Till (Code 329)
2. Certification that the design meets practice standard criteria and comply with applicable laws and regulations on the 329 Implementation Requirements Document
3. Design modifications during application as required
4. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describes the requirements to install the practice and obtain necessary permits documented on the 329 Implementation Requirements Document.

INSTALLATION

Deliverables

1. Application guidance as needed via a completed Implementation Requirements Document
2. Facilitate and implement required design modifications with client and original designer
3. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation
4. Certification that the application process meets design and permit requirements

CHECK OUT

Deliverables

1. Records of application
 - a. Extent of practice units applied
 - b. Actual field operations performed and the amount of residue present during critical period to meet targeted standard criteria
2. Certification that the application meets NRCS standards and specifications and is in compliance with permits on the 329 Implementation Requirements Document.
3. Progress reporting
