

# 812 Raised Beds Interim Practice Evaluation Document

What was the soil limitation that necessitated the use of Raised Beds?  
Please include any related soil test result data such as lead test results in ppm.

Please attach the completed Raised Beds Implementation Requirements with As-Built/Red line notes indicating at a minimum:

- Beds framed or unframed (If framed, frame material)
- Number of Beds Installed
- Total Square Footage of beds installed
- Barrier use (If barrier used, what type)

Please attach Photos of completed practice with descriptions. Of particular interest are any areas of issues with the practice such as material failures, growing material settling, erosion adjacent to practice. If a barrier was used, inspect the barrier material for damage where contact with traffic or machinery cannot be avoided. If this is applicable to the project being evaluated, was there damage to the barrier material? If so, list damage type and extent.

Did the client report difficulties in implementing this practice? Yes      No  
If so, what difficulties did the client report?

Field Office comments on interim practice standard, or interim practice implementation requirements:
