

# ACCESS CONTROL

## PRACTICE INTRODUCTION

USDA, Natural Resources Conservation Service - practice code 472

### DEFINITION

Access Control is excluding animals, people or vehicles from an area.

### PRACTICE INFORMATION

The purpose of Access Control is to protect, maintain, or improve the quantity and quality of the natural resources in an area. The purpose also includes aesthetic resources as well as human health and safety.

The practice is used in a conservation plan in areas where vegetation establishment or maintenance is a concern. Protecting the

vegetation is often essential to conserving the other natural resources.

The barriers constructed for Access Control must be adequate to prevent intrusion of the target animals, vehicles or people. The barriers are usually fences, but may also be natural and artificial structures such as logs, boulders, earth fill, gates, signs, etc.

Additional information including design criteria and specifications are in the local NRCS Field Office Technical Guide.
