Twn

Range

Field No.

NRCS Field Office

County

This conservation practice is an asset to your farm or ranch. This practice will need periodic operation and maintenance to maintain satisfactory performance. The life of this practice or system is at least 10 years. The life of this practice can be assured or extended by thorough and timely operation and maintenance. Here are some recommendations to help you develop a good operation and maintenance program.

GENERAL RECOMMENDATIONS

Only operate the system when needed to furnish water for plant growth.

Operate the system at the pressure, discharge rate, duration and frequency as designed.

Check to make sure that all connections are water tight and all valves are working properly.

Periodically check the sprinkler heads for wear, and replace with proper parts when defective or excessive wear is found.

Promptly repair all leaks by replacing gaskets or worn parts.

During non-seasonal use, drain and place the removable parts of the system in an area where it will not be damaged.

Immediately repair any damages from vandalism, vehicles, or livestock.

Contact your local Natural Resources Conservation Service for any additional technical assistance that you might need for implementation of this operation and maintenance plan for your structure.

Specific Recommendations For Your Installation

Contact your local Natural Resources Conservation Service for any additional technical assistance that you might need for implementation of this operation and maintenance plan for your structure.
