

TECHNICAL NOTES

U.S. DEPARTMENT OF AGRICULTURE STATE OF COLORADO NATURAL RESOURCES CONSERVATION SERVICE

BIOLOGY TECHNICAL NOTE NO. 46

October 2007

To: All Field and Area Offices

From: Terri Skadeland, State Biologist

This Technical Note transmits the electronic document, "Integrating Bird Conservation into Range Management," available at:

http://www.rmbo.org/dataentry/postingArticle/dataBox/RMBO_SARE_manual_Jun_06.pdf

Please be patient when opening this document because it is a large file and takes some time to open.

This document was produced by Rocky Mountain Bird Observatory (RMBO) in partnership with a number of groups and agencies including NRCS. It has information on the habitat needs of Eastern Plains grassland birds that should be helpful to planners and landowners developing rangeland management plans.
