

**STATEMENT OF WORK
Pest Management (595)
Hawaii**

These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.

DESIGN

Deliverables

All design documents shall be developed in accordance with the requirements of the [NRCS Hawaii Field Office Technical Guide \(eFOTG\)](#), Section IV, Conservation Practice Standard.

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices.
 - a. Practice purpose(s) as identified in the conservation plan.
 - b. List of required permits to be obtained by the client.
 - c. Practice standard criteria-related computations and analyses to develop plans and specifications including but not limited to:
 - i. Identification of targeted species.
 - ii. Control methods (e.g. biological, cultural, chemical, mechanical).
 - iii. Environmental risk assessment of planned control method (May use Windows Pesticide Screening Tool [Win-PST]).
 - iv. Mitigation techniques, if necessary.
2. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describes the requirements to install the practice and obtain necessary permits. *The [NRCS Hawaii Field Office Technical Guide \(eFOTG\)](#) Section IV, National Jobsheet for the practice shall be completed and used to provide the client with requirements to install the practice (as a minimum, must include Pest Management Conservation Practice Jobsheet 595).*
3. Documentation of needed operation and maintenance. *The [NRCS Hawaii Field Office Technical Guide \(eFOTG\)](#) Section IV, National Jobsheet for the practice shall be completed and used to provide the client with requirements for the operation and maintenance of the practice*
4. Certification that the design meets practice standard criteria and comply with applicable laws and regulations.
5. Design modifications during installation as required.

INSTALLATION

Deliverables

1. Pre-application conference with client.
2. Verification that client has obtained required permits.
3. Layout and communication of setback requirements for wetlands, water bodies, streams and other pest control-sensitive areas.
4. Application guidance as needed.
5. Facilitate and implement required design modifications with client and original designer.
6. Advise client/NRCS on compliance issues with all federal, state, and local laws, regulations and NRCS policies during installation.
7. Certification that the application process and materials meet design and permit requirements.

**STATEMENT OF WORK
Pest Management (595)
Hawaii**

CHECK OUT

Deliverables

1. Records of application.
 - a. Extent of practice units applied.
 - b. Actual materials/control method/mitigation techniques used.
 - c. Application rate, method and timing.
2. Certification that the application meets NRCS standards and specifications and is in compliance with permits.
3. Progress reporting.
