

STATEMENT OF WORK
Irrigation System, Sprinkler (442)
Kansas
July 2004

State contact: John Ourada, State Conservation Engineer, 785-823-4534, john.ourada@ks.usda.gov

These deliverables apply to this individual practice. For other planned practice deliverables, refer to those specific statements of work.

DESIGN

Deliverables

1. Design documentation that will demonstrate that the criteria in the Natural Resources Conservation Service (NRCS) practice standard has been met and is compatible with other planned and applied practices
 - a. Practice purpose(s) as identified in the conservation plan
 - b. List of required permits to be obtained by the client
 - c. Compliance with NRCS national and state utility safety policy (National Engineering Manual [NEM] Parts 503.00 through 503.06)
 - d. List of facilitating/component practices
 - e. Practice standard criteria-related computations and analyses to develop plans and specifications including but not limited to the following (Form KS-ENG-201, Irrigation System Sprinkler - 442, or equivalent):
 - i. System capacity
 - ii. Depth of application, rate, frequency, pressure and uniformity (Form KS-ENG-22, Center Pivot Sprinkler Design, or equivalent)
 - iii. Hydraulics
2. Written plans and specifications (including sketches and drawings) shall be provided to the client that adequately describe the requirements to install the practice and obtain necessary permits.
3. Operation and maintenance plan
4. Certification that the design meets practice standard criteria and complies with applicable laws and regulations (NEM Part 505.03(b)(2))
5. Design modifications during installation as required
6. If enrolled in a conservation program, this practice must meet all conditions and requirements of program enrollment that may exceed the practice standard.

INSTALLATION

Deliverables

1. Pre-installation conference with client and contractor
2. Verification that client has obtained required permits
3. Staking and layout according to plans and specifications including applicable layout notes
4. Installation inspection (according to inspection plan as appropriate)
 - a. Actual materials used
 - b. Inspection records
5. Facilitate and implement required design modifications with client and original designer
6. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws and regulations and NRCS policies during installation
7. Certification that the installation process and materials meet design and permit requirements

**STATEMENT OF WORK
Irrigation System, Sprinkler (442)
Kansas
July 2004**

CHECKOUT

Deliverables

1. As-built documentation (Form KS-ENG-201, Irrigation System, Sprinkler - 442, or equivalent)
 - a. Extent of practice units applied
 - b. Drawings
 - c. Final quantities
2. Certification that the installation meets NRCS standards and specifications and is in compliance with permits (NEM Part 505.03(c)(1))
3. Progress reporting
