

**STATEMENT OF WORK**  
**Land Reclamation, Toxic Discharge Control (455)**  
**Kansas**  
**November 2007**

**State contact: John Ourada, State Conservation Engineer, 785-823-4534, john.ourada@ks.usda.gov**

**These deliverables apply to this individual practice. For other planned practice deliverables, refer to those specific statements of work.**

## **DESIGN**

---

### **Deliverables**

1. Design documentation that will demonstrate that the criteria in the Natural Resources Conservation Service (NRCS) practice standard has been met and is compatible with other planned and applied practices
  - a. Practice purpose(s) as identified in the conservation plan
  - b. List of required permits to be obtained by the client
  - c. List of facilitating practices
  - d. Compliance with NRCS national and state utility safety policy (National Engineering Manual [NEM] Sections 503.00 through 503.06)
  - e. Practice standard criteria-related computations and analyses to develop plans and specifications including but not limited to the following:
    - i. Geologic and hydrologic investigations
    - ii. Mining history and land use
    - iii. Identification of primary method for controlling toxic mine drainage
    - iv. Water quantity and quality provisions
2. Written plans and specifications (including sketches and drawings) shall be provided to the client that adequately describe the requirements to install the practice and obtain necessary permits.
3. Operation and maintenance plan
4. Certification that the design meets practice standard criteria and complies with applicable laws and regulations (NEM Part 505.03(b)(2))
5. Design modifications during installation as required
6. If enrolled in a conservation program, this practice must meet all conditions and requirements of program enrollment that may exceed the practice standard.

## **INSTALLATION**

---

### **Deliverables**

1. Pre-installation conference with client
2. Verification that client has obtained required permits
3. Staking and layout of measures according to plans and specifications including applicable layout notes
4. Installation guidance as needed
5. Facilitate and implement required design modifications with client and original designer
6. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws and regulations and NRCS policies during installation
7. Certification that the installation process and materials meet design and permit requirements

**STATEMENT OF WORK**  
**Land Reclamation, Toxic Discharge Control (455)**  
**Kansas**  
**November 2007**

**CHECKOUT**

---

**Deliverables**

1. As-built documentation
  - a. Extent of practice units applied
  - b. Actual measures and materials used and applied
  - c. Drawings
  - d. Final quantities
2. Certification that the application meets NRCS standards and specifications and is in compliance with permits (NEM Section 505.03(c)(1))
3. Progress reporting
