

STATEMENT OF WORK
Amendments for the Treatment of Agricultural Waste (591)
Oklahoma

These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.

DESIGN

Deliverables:

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices.
 - a. Practice purpose(s) as identified in the conservation plan
 - b. List of required permits to be obtained by the client
 - c. Practice standard criteria-related computations and analyses to develop plans and specifications including but not limited to:
 - i. Identification of the targeted physical or chemical characteristics of the waste stream, treatment level, objective of treatment
 - ii. Control methods (e.g. biological, chemical) and objective of treatment
 - iii. Amendment validation by an independent entity
 - iv. Material Data Safety Sheet (MSDS) and label for the selected amendment
 - v. Method of storage and volume of the treated waste or treatment by products
 - vi. Environmental risk assessment of planned amendment
 - vii. Mitigation techniques, if necessary
2. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describes the requirements to install the practice and obtain necessary permits. Plans and specifications shall be developed in accordance with the requirements of conservation practice standard Amendments for the Treatment of Agricultural Waste (591).
3. Documentation of needed operation and maintenance
4. Design modifications during installation as required
5. Certification that the design meets practice standard criteria and complies with applicable laws and regulations.
Note: A copy of the product label, copy of the receipt for the product, and practice implementation information should be well documented in the assistance notes or job diary.

INSTALLATION

Deliverables:

1. Pre-application conference with client.
2. Verification that client has obtained required permits.
3. Layout or measurement of the treatment areas including measurements and survey notes and drawings or sketches.
4. Application guidance documentation including the materials used, method of application and mixing, testing completed. This information should be well documented in the assistance note or job diary.
5. Facilitate and implement required design modifications with client and original designer.
6. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation.
7. Certification that the application process and materials meet design and permit requirements.
Note: A copy of the product label, copy of the receipt for the product, and practice implementation information should be well documented in the assistance notes or job diary.

CHECK OUT

Deliverables:

1. Records of application.
 - a. Extent of practice units applied
 - b. Actual materials/control method/mitigation techniques used
 - c. Application rate, method and timing
 - d. Objective of treatment, targeted physical or chemical characteristics of the waste stream and treatment level obtained
2. Certify and document that all the criteria listed in the Design Deliverables meet NRCS standards and specifications and are in compliance with permits.

STATEMENT OF WORK
Amendments for the Treatment of Agricultural Waste (591)
Oklahoma

3. Progress reporting.

Note: A copy of the product label, copy of the receipt for the product, and practice implementation information should be well documented in the assistance notes or job diary.
