A properly operated and maintained pond liner is an asset to your farm. This pond lining is designed and installed to limit the seepage loss from the pond. The estimated life span of this system is at least 10 years. The life of this system can be assured and usually increased by developing and carrying out a good operation and maintenance program.

Following are recommendations for the operation and maintenance of your pond sealing or lining – flexible membrane.

OPERATION RECOMMENDATIONS

- Limit the use or travel in the area which is lined.
- Prevent all livestock from using any area of the pond which has artificial liners.
- Do not drop any objects on liner.
- Do not place additional weight or objects with sharp edges on the lining material.
- Additional operation recommendations are as follows:
