

Section V-A. Effects for RMS Formulation Introduction

This section consists of two subsections:

Subsection V-A-1, General Effects Data, includes Conservation Practice Physical Effects (CPPE) Worksheets. The CPPE worksheets display in subjective detail the physical effects that conservation practices have on resource problems for the natural resources based on experience and available technical information.

Subsection V-A-2, Effects for Guidance Documents, includes two worksheets (Site Specific Practice Effects worksheet and Resource Management System Options worksheet) can be used in conjunction with the CPPE to aid the planning process.

Additional information about section V-A material and how to use it is contained in the following section of the National Planning Procedures Handbook.
