

FOREWORD

This Irrigation Guide is for the entire state of North Dakota. It is a complete revision and supersedes the Irrigation Guide for Western North Dakota dated 1955 and the Irrigation Guide for Eastern North Dakota dated 1956. The guide has been prepared by the Soil Conservation Service for use by trained technicians to provide planning and design assistance in the preparation of technically sound irrigation plans and the use of conservation measures on the irrigated lands.

The Irrigation Guide is based on the most recent complete technical data available. As more technical material is made available, additions and refinements will be made.

Acknowledgements are due the Agricultural Research Service, the Cooperative Extension Service, the Agricultural Engineering Department and the Soils Department of North Dakota State University, the Bureau of Reclamation, the United States Geological Survey, and the North Dakota State Water Commission for assistance in developing this Irrigation Guide.
