

## CROPLAND INTERPRETATIONS

Information in this subsection can be used to plan the use and management of soil for crops or pasture. Conservation planners and others using this information can evaluate the effect of specific crops on productivity and on the environment in all or part of the county. This information can be used to maintain or create a land use pattern that is in harmony with the natural soil.

### **This subsection contains the following:**

Prime Farmland List
Highly Erodible List
Land Capability Classification
Crop Yield Estimates
Soil Erodibility (K) Factor and Soil Loss Tolerance (T) Value
Hydrologic Soil Groups
Additional Farmland of Statewide Importance
