## Source Data for the Official Soil Survey

### **Yancey County - General**

The traditional final product of first generation soil survey mapping has been the soil survey publication. Each publication includes soil map unit descriptions, series descriptions, tables of information (attributes), and maps. One copy of this publication is retained at the NRCS Field Office and is designated as the "Official Copy." This official copy was established to maintain the most current soils information for a survey area.

The Yancey County soil survey is not yet published. The field sheets are the official source of soil maps. The soil survey publication is in draft format. The soil maps have been digitized and are available at no charge from the following website:

[http://www.ftw.nrcs.usda.gov/ssur\\_data.html](http://www.ftw.nrcs.usda.gov/ssur_data.html)

The official source of soil data is the NASIS database and the digital spatial data (SSURGO). The data on these sites are the most current available. The SSURGO tabular and/or spatial data may be downloaded from:
