

SOIL SURVEY LEGEND FOR WASHINGTON COUNTY

This legend is a listing of all of the soil map units mapped in the county. Eighty-five percent of the organized area of Washington County has been mapped. No new map units are expected to be established as the mapping is completed. In the left hand column are the soil symbols as they appear on the soil survey field maps. In the right hand column are the alphabetical symbols as they will appear in the published soil survey report for Washington County. In some cases, one or more numerical symbols (those in parenthesis) have been eliminated and combined into an alphabetical symbol that represents a single map unit. They have been combined because of small acreage and because the soils are very similar or because of changes in the classification system since the soil was mapped. In the published report the symbols on the maps and the legend will be alphabetical.

Soils with numbers in the 20's and 200's are order 2 map units. These units have upper and lower case letters in the alphabetic legend. Soils with numbers in the 30's and 300's are order 3 map units. These units have all upper case letters in the alphabetic legend. The last letter in the symbol usually indicates the slope of the map unit.

<u>Field Symbol</u>	<u>Map Unit Name</u>	<u>Publication Symbol</u>
27A	KINSMAN SAND	Kn
29T	GOULDSBORO SILT LOAM	Go
29X	UDORTHENTS-URBAN COMPLEX	Ud
39G (29G)	SEBAGO AND WASKISH SOILS	SG
39M(29M)	WONSQUEAK AND BUCKSPORT SOILS, FREQUENTLY FLOODED	WF
39P (29P)	BUCKSPORT AND WONSQUEAK SOILS	BW
39RC	NASKEAG-ABRAM-RICKER COMPLEX, 0 TO 15 PERCENT SLOPES, VERY STONY	NAC
39RE	ABRAM-ROCK OUTCROP-RICKER COMPLEX, 15 TO 80 PERCENT SLOPES	ACE
215B	CROGHAN LOAMY SAND, 3 TO 8 PERCENT SLOPES	CzB
216A	ADAMS LOAMY SAND, 0 TO 3 PERCENT SLOPES	AdA
