

TABLE 3

SINGLE YEAR "C" VALUES
ZONE 86E

Yield Level: AVERAGE

CROP TO BE HARVESTED: **ROTATION HAY**

CROP SEQUENCE	CLEAN TILL		FALL MULCH TILL % COVER						SPRING MULCH TILL % COVER						RIDGE TILL (Cultivated) % COVER						STRIP TILL (Cultivated) % COVER						NO TILL (Cultivated) % COVER											
	FP	SP	05	10	20	30	40	50	60	05	10	20	30	40	50	60	10	20	30	40	50	60	20	30	40	50	60	70	05	10	20	30	40	50	60	70	80	
Established Alfalfa (Nurse Crop Residue Left):																																						
1st Year @ Seeding			.003 For all tillage systems.																																			
2nd Year @ Seeding			.003 For all tillage systems.																																			
3rd Year @ Seeding			.004 For all tillage systems.																																			
4th Year @ Seeding			.004 For all tillage systems.																																			
Established Alfalfa (Nurse Crop Residue Rmv):																																						
1st Year @ Seeding			.006 For all tillage systems.																																			
2nd Year @ Seeding			.005 For all tillage systems.																																			
3rd Year @ Seeding			.005 For all tillage systems.																																			
4th Year @ Seeding			.004 For all tillage systems.																																			
Established Alfalfa (Direct Seeded):																																						
1st Year @ Seeding			.025 For all tillage systems.																																			
2nd Year @ Seeding			.010 For all tillage systems.																																			
3rd Year @ Seeding			.006 For all tillage systems.																																			
4th Year @ Seeding			.005 For all tillage systems.																																			
Established Legume Grass: All Years Stand Is Maintained:			.001 For all tillage systems.
