

SUBPART C - EVALUATION OF CONSTRUCTION MATERIALS

NE512.23

§NE512.23 Prequalification of materials.

(c)(1) A listing of precertified manufacturers of plastic pipe and tubing and corrugated metal pipe for conservation practices in Nebraska will be issued by bulletin. The list will be updated periodically by the state office. Due to the limited use and/or myriad of possible qualified fabricators, materials such as concrete pipe supports, trash racks, tile outlet risers, drip-sprinkler outlets, valves, etc. are not listed specifically. Technicians should satisfy themselves that the materials meet specifications even though a product is precertified.
