

Source Data for the Official Soil Survey

Randolph County

The traditional final product of first generation soil survey mapping has been the soil survey publication. Each publication included soil map unit descriptions, series descriptions, tables of information (attributes), and maps.

Field work for the soil survey of Randolph County has been completed, but the survey has not yet been published.

The official copy of the soil maps for this survey is the soil survey field sheets in the local NRCS field office. Information about this soil survey and the availability of soil maps can be obtained by contacting the local NRCS field office. Contact information for the local NRCS field office can be found at the [USDA Office Information Locator](#).

The official source of soils data (attributes) for this soil survey area is the National Soils Information System (NASIS) database as delivered through the [Soil Data Mart](#).

A database containing the soils information can be downloaded from the [Soil Data Mart](#). Web based reports are also available.
