

**NATURAL RESOURCES CONSERVATION SERVICE  
CONSERVATION PRACTICE STANDARD**

**WELL WATER TESTING**

(No.)

**CODE 355**

**DEFINITION**

Testing for physical, biological and chemical characteristics of well water.

**PURPOSE**

To determine the quality of a water supply for the intended use.

**CONDITIONS WHERE PRACTICE APPLIES**

This standard applies to water supplies that are used or have potential to be used on farms or ranches.

**CRITERIA**

The specific use of the water and the water quality concerns shall be identified.

The required tests and applicable standards shall be determined based on the planned use of the water.

Water samples shall be collected and analyzed in accordance with established procedures. Contact the testing entity for specific guidance.

Interpretation of test results and recommendations for remedial actions, as necessary, shall be obtained from a knowledgeable source appropriate to the test and purpose.

**CONSIDERATIONS**

The following items should be considered in planning water supply testing:

- Location and depth of supply, type of geology and history of site in relationship to sources of potential contamination such as surface water, septic system, chemical storage facilities, roads, and animal waste storage or

treatment facility.

- Water supply construction practices used such as dug, drilled, casing, or spring development.
- Using a computerized total farm record keeping system for ease of data input, analysis, and retrieval.
- Using a state certified laboratory.

**PLANS AND SPECIFICATIONS**

Plans and specifications for water testing shall be consistent with this standard to achieve the desired results.

Specify guidelines describing process of collection, storage, transport, testing and reporting.

**OPERATION AND MAINTENANCE**

Records on water testing information will include:

- Date water sample taken,
- Name and title of person who collected sample,
- Standard collection procedure followed,
- Water test analysis date,
- Laboratory used,
- Contaminants tested for,
- Schedule of additional testing at required frequency according to applicable standard.
- Records to evaluate trends and the effects of remedial action.
- Weather data, and
- Other records as required
