NOVEMBER 2005 THROUGH FEBRUARY 2006

May 25, 2006

## PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 2005 THROUGH FEBRUARY 2006

This report is prepared by the Illinois Field Office of the National Agriculture Statistics Service in cooperation with the Illinois Department of Natural Resources - Division of Forestry. *The cooperation of those timber buyers who participated in the survey is greatly appreciated.*

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report. Of the timber buyers reporting volume of their 2005 operations, 59% indicated their volume was 500 thousand board feet or more.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Natural Resources, One Natural Resources Way, Springfield, Illinois 62702.

Prices from 1978 to current can be seen at:
