

Cropland Interpretations

Information in this subsection can be used to plan the use and management of soils for crops or pasture. Conservation planners and others using this information can evaluate the effect of crop management systems on productivity and on the environment in all or part of the county. This information can be used to maintain or create a land use pattern that is in harmony with the natural soil.

This subsection contains the following:

- Explanation of Soil Erodibility (K) factor
- Explanation of Soil-Loss Tolerance (T) Value
- Explanation of Hydrologic Soil Groups
- Prime Farmland List
- Land Capability Classification
- Productivity Estimates
- Rangeland Interpretations
