

Operation and Maintenance Requirements
<p>Maintain all equipment for the proper placement and distribution of amendments and irrigation water.</p> <p>Monitor the germination and growth of seedlings along with soil dispersal and crust formation to determine if toxic levels of salt or sodium remain.</p> <p>Develop a management strategy to reduce the reoccurrence of salt and/or sodium problems.</p> <p>Identify any required items needed to assist in stand establishment such as mowing, flash grazing and/or herbicides to control weeds.</p> <p>Address insect and disease control needs where they are likely to create establishment problems.</p> <p>Address any necessary replanting due to drought, insects or other uncontrollable events that prevented adequate stand establishment.</p> <p>Replanting activities may vary from complete reestablishment to overseeding or spot replanting.</p>
