Wildlife Habitat Evaluation  
Pasture and Permanent Hayland**

**Name:** \_\_\_\_\_ **Date:** \_\_\_\_\_

**Farm Number:** \_\_\_\_\_ **Tract Number:** \_\_\_\_\_ **Field Number(s):** \_\_\_\_\_ **County:** \_\_\_\_\_

If using this evaluation for "old field" or "idle areas," tree and shrub canopy coverage must be less than 30%.

Check (under 'E') and record the score for each of the criteria below to document the existing conditions as part of the inventory and evaluation process. The score for planned conditions should be circled and recorded for alternatives developed or decisions made.	<b>Points if Existing</b>	<b>Points if Planned</b>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------	--------------------------

**E (1) Pasture and Hayland Management**

**NOTE:** If the score for (6) Field Size (page 2) is less than 0.5 and this score (1) is 0.2 or less, then Index is '0':  
When (6) <0.5 AND (1) = 0.2 or less, then Index = 0.
