

**NATURAL RESOURCES CONSERVATION SERVICE  
CONSERVATION PRACTICE CONSTRUCTION SPECIFICATION  
SOLID/LIQUID WASTE SEPARATION FACILITY  
CODE 632**

A separate and distinct construction specification for this practice has not been prepared. The installation of a solid/liquid separation facility will be in accordance with the following conservation practice specifications, as may be appropriate:

634 – Manure Transfer

378 – Pond

521A – Pond Sealing or Lining – Flexible Membrane

587 – Structure for Water Control

587C – Structure for Water Control, Concrete

587MF – Structure for Water Control, Metal Fabrication

The designer may also select other specifications developed for the type of structure as may be applicable.
