

**FY 13 NRCS Conservation Activity Plans (CAPs )**

<b>CAP</b>	<b>CAP Name*</b>	<b>General Descriptions of CAPs - Approved for EQIP - Fiscal Year 2013</b>
102	Comprehensive Nutrient Management Plan	A comprehensive nutrient management plan (CNMP) is a conservation plan for an animal feeding operation (AFO)
104	Nutrient Management Plan	Nutrient management plans are documents of record of how nutrients will be managed for plant production and to address the environmental concerns with the offsite movement of nutrients.
106	Forest Management Plan	A forest management plan is a site specific plan developed for a client, which addresses one or more resource concerns on land where forestry-related conservation activities or practices will be planned and applied.
114	Integrated Pest Management Plan	Integrated Pest Management (IPM) is an ecosystem-based strategy that is a sustainable approach to manage pests using a combination of techniques such as chemical tools biological control, habitat manipulation, and modification of cultural practices and use of resistant varieties.
118	Irrigation Water Management Plan	The objective of Irrigation Water Management (IWM) is to control the volume, frequency, and rate of water for efficient irrigation
122	Agricultural Energy Management Plan - Headquarters	An Agricultural Energy Management Plan- Headquarters (AgEMP) is a detailed documentation of energy consuming components and practices of the current operation, the previous year's on-farm energy consumption, and the strategy by which the producer will explore and address their on-farm energy conservation concerns, objectives, and opportunities.
124	Agricultural Energy Management Plan - Landscape	A Landscape Agricultural Energy Management Plan (Landscape AgEMP) contains the strategy by which the producer will explore and address producer/grower on-farm energy savings and opportunities on the working land (crop, forest, pasture, range).
130	Drainage Water Management Plan	The objective of a Drainage Water Management (DWM) is to control soil water table elevations and the timing of water discharges from subsurface or surface agricultural drainage systems
138	Conservation Plan Supporting Organic Transition	A "Conservation Plan Supporting Organic Transition" is a conservation activity plan documenting decisions by producers/growers who agree to implement a system of conservation practices which assist the producer to transition from conventional farming or ranching systems to an organic production system.
150	Oil Spill, Prevention, Control, and Countermeasure (SPCC)	An Oil Spill Prevention, Control, and Countermeasure (SPCC) conservation activity plan (CAP) is a plan prepared and certified by a registered Professional Engineer (PE) in accordance with the U.S. Environmental Protection Agency (EPA) rules for producers with more than 10,000 gallons of liquid storage capacity.
