

## Illinois Wetland Mapping Conventions Amendment #2

**The Illinois Wetland Mapping Conventions shall be amended by deleting the entire third paragraph of the INTRODUCTION pertaining to field verification of certified wetland determinations.**

Explanation: Certified wetland determinations may be made without an onsite investigation if procedures in “Food Security Act Wetland Identification Procedures (2010)” (National Food Security Act Manual (NFSAM) Part 527 Circular No. 6) are followed including the Illinois Wetland Mapping Conventions.

Site visits are still required per NFSAM Part 514.1 (A)(3) in some cases. These situations include:

- The determination may jeopardize USDA benefits (determination of CW or CW+yr)
- An onsite determination is requested by the participant
- In response to an appeal
- In response to form FSA-569
