

**NATURAL RESOURCES CONSERVATION SERVICE
PACIFIC ISLANDS AREA**

STATEMENT OF WORK

**RESIDUE AND TILLAGE MANAGEMENT,
MULCH TILL (345)**

These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.

DESIGN

All design documents shall be developed in accordance with the requirements of the [NRCS Pacific Islands Area Field Office Technical Guide \(FOTG\)](#) Section IV, Conservation Practice Standard.

Deliverables:

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices.
 - a. Practice purpose(s) as identified in the conservation plan.
 - b. List of required permits to be obtained by the client.
 - c. List all required and/or facilitating practices.
 - d. Practice standard criteria-related computations and analyses to develop plans and specifications including but not limited to:
 - i. Results of NRCS erosion prediction tools or equivalent, and other applicable technical tools to address targeted criteria.
 - ii. Planned residue amount.
 - iii. Orientation of residue.
 - iv. Distribution of residue.
 - v. Timing of soil disturbance.
 - vi. Other requirements of the conservation practice standard Residue Management, Mulch Till (Code 345)
2. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describes the requirements to install the practice and obtain necessary permits. Plans and specifications shall be developed in accordance with the conservation practice standard Residue and Tillage Management, Mulch Till (Code 345). The Pacific Islands Area Conservation Practice Jobsheet for this practice shall be used to provide the client with the requirements to install the practice on the treatment unit. The Jobsheet is available in Section IV of the Pacific Islands Area [FOTG](#).
3. Operation and maintenance plan. The Pacific Islands Area Conservation Practice Jobsheet for this practice shall be used to provide the client with the requirements for the operation and maintenance of the practice on the treatment unit. The Jobsheet is available in Section IV of the Pacific Islands Area [FOTG](#).
4. Certification that the design meets practice standard criteria and comply with applicable laws and regulations.
5. Design modifications during application as required.

INSTALLATION

Deliverables

1. Verification that client has obtained required permits.
2. Application guidance as needed.
3. Facilitate and implement required design modifications with client and original designer.

4. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during application.
5. Certification that the application process and materials meets design and permit requirements.

CHECK OUT

Deliverables

1. Records of application.
 - a. Extent of practice units applied.
 - b. Actual amount of residue present during critical period to meet targeted standard criteria.
2. Certification that the application meets NRCS standards and specifications and is in compliance with permits.
3. Progress reporting.
