TECHNICAL GUIDE NOTICE ND-40

This notice transmits field office specific information on Wellhead Protection (WHP) Program areas for Section I, Reference List.

In addition to the nearly 300 North Dakota communities that rely on groundwater as their sole source of drinking water, there are numerous non-community water systems with wellhead protection areas. These areas are found near recreation areas and public facilities that have their own water source.

The North Dakota Department of Health (NDDH) has developed and is implementing a proactive groundwater protection program called WHP. The Federal Safe Drinking Water Act Amendments of 1986 created WHP and delegated authority to implement the program at the State level. Groundwater protection is accomplished at the local level through the voluntary actions of the individual public water supplier throughout the State.

Please review the attached map(s). As you work with producers in the WHP areas, consider the WHP Program as another resource issue we should address. Should you require the specific information, please contact NDDH, WHP Program, Division of Water Quality.

Filing Instructions:

File the following field office specific WHP in the Water Quality and Water Quantity Section of the Reference File.

<u>County</u>	<u>Field Office</u>	<u>Area</u>
Barnes	Valley City	Clausen Springs Recreation Complex
Barnes	Valley City	Little Yellowstone Park
