BIOLOGY TECHNICAL NOTE NO. 82

Ritch Nelson
State Wildlife Biologist

A Landowner's Guide to Wildlife Friendly Fences: How to Build Fence with Wildlife in Mind

Enclosed is a copy of *A Landowner's Guide to Wildlife Friendly Fences: How to Build Fence with Wildlife in Mind*. This publication was developed by Montana Fish, Wildlife and Parks but the principles within it can be applied to fence design and installation in Nebraska. It includes information about how fences can be a hazard to various wildlife species and includes a number of different methods to reduce or eliminate those detrimental impacts. This publication can be very useful as a supplement to the Fence (382) Standard, especially when wildlife habitat objectives exist for the site being planned or the conservation program being applied.
