STATEMENT OF WORK
Stream Crossing (578)

These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.

DESIGN

Deliverables:
1. Design documentation that will demonstrate that the criteria in NRCS practice standard have been met and are compatible with other planned and applied practices.
   a. Type of stream crossing and practice purpose(s) as identified in the conservation plan.
   b. List of required permits to be obtained by the client.
   c. Impacts on adjacent properties and structures.
   d. Compliance with NRCS national and state utility safety policy (NEM Part 503-Safety, Subpart A - Engineering Activities Affecting Utilities 503.00 through 503.06).
   e. List of facilitating practices
   f. Practice standard criteria related computations and analyses to develop plans and specifications including but not limited to:
      i. Geology/Soil Mechanics
      ii. Hydrology/Hydraulics
      iii. Structural
      iv. Vegetation/Soil Bioengineering
2. Written plans and specifications including sketches and drawings as well as any applicable guide sheets shall be provided to the client that adequately describes the requirements to install the practice and obtain necessary permits.
4. Operation and Maintenance Plan
5. Certifications that the design meets practice standard criteria and comply with applicable laws and regulations [NEM Part 505, Non-NRCS Engineering, Subpart A, 505.03(b)(2)].
6. Design modifications during installation as required.

INSTALLATION

Deliverables
1. Pre Installation conference with client and contractor which includes information on minimizing erosion and controlling sediment during construction.
2. Verification that client has obtained required permits.
3. Staking and layout according to plans and specifications including applicable layout notes.
4. Installation inspection (according to inspection plan as appropriate).
   a. Actual materials used.
   b. Inspection records
5. Facilitate and implement required design modifications with client and original designer.
6. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation.
7. Certification that the installation process and materials meets design and permit requirements.

CHECK OUT

Deliverables
1. As-Built documentation.
   a. Extent of practice units applied
   b. Drawings
   c. Final quantities
2. Check out surveys to verify that construction meets plans ans specifications.
3. Certification that the installation meets NRCS standards and specifications and is in compliance with permits [NEM Part 505, Non-NRCS Engineering, 505.03 (c) (1)].
4. Progress reporting.
