

AL 651.1003 - Storage

The new EPA CAFO Rule requires that waste management and storage facilities for large swine, veal, and poultry CAFO's are to be designed, constructed, operated and maintained to contain all litter, manure, and process wastewater including the runoff and direct precipitation from a 100-year, 24-hour rainfall event.

AL 651.1004 - Treatment

The new EPA CAFO Rule requires that waste management and storage facilities for large swine, veal, and poultry CAFO's are to be designed, constructed, operated and maintained to contain all litter, manure, and process wastewater including the runoff and direct precipitation from a 100-year, 24-hour rainfall event.

AL 651.1004(f)(10)(i) - Treatment - Composting - Dead animal composting - Special planning considerations

The State Veterinarian's Office of the Alabama Department of Agriculture and Industries requires the permitting of dead animal compost that leaves the farm of origin.

AL 651.1004(j) - Treatment - Vegetative filters

Vegetative filters are planned and designed according to Conservation Practice Standard, Wastewater Treatment Strip, Code 635.

AL 651.1007(b) - Ancillary components - Dead animal disposition

Disposal (burial) pits are not allowed as an acceptable animal disposal method by the State Veterinarian's Office of the Alabama Department of Agriculture and Industries.
