

Crop residue measurement worksheet
(for use with the line transect method)

State _____	County _____	
Land user _____	Opid _____	Tract _____

Field no. _____ Planned residue level _____ percent Residue type _____

Transect number	Total number of points ^{1/}	Number of points with residue ^{2/}	Percent residue this transect
1			
2			
3			
4			
5			

Average percent residue for field

Field no. _____ Planned residue level _____ percent Residue type _____

Transect number	Total number of points ^{1/}	Number of points with residue ^{2/}	Percent residue this transect
1			
2			
3			
4			
5			

Average percent residue for field

1/ To achieve the degree of accuracy quoted in the NAM-recommended procedure for using the line transect method, each transect must be based on looking at a total of at least 100 points.

2/ Attach a map or sketch showing the location of each line transect within the field. All measurements shall be made using the line transect procedure contained in the National Agronomy Manual.
