

**NATURAL RESOURCES CONSERVATION SERVICE
CONSERVATION PRACTICE OPERATION AND MAINTENANCE**

**FIREBREAK
(Ft.)
CODE 394**

OPERATION AND MAINTENANCE

Mow, disk, or graze vegetative firebreaks to avoid a build-up of excess litter and to control weeds. Treatment should be timed to reduce impacts to nesting when possible.

Inspect all firebreaks for woody materials such as dead limbs or blown down trees and remove them from the firebreak.

Inspect firebreaks at least annually and rework

bare ground firebreaks as necessary to keep them clear of flammable vegetation.

Repair erosion control measures as necessary to ensure proper function.

Access by vehicles or people will be controlled to prevent damage.

Bare ground firebreaks which are no longer needed will be stabilized.
