RANGE TECHNICAL NOTE NO. CA – 54

**SUBJECT: Prescribed Grazing (528) Practice Requirement Sheet and Specification
Development Support Tool (528_spec_tool_R5a.xls)**

Purpose: To transmit the above named Technical Note

Effective Date: When contents are received.

Background:

The national conservation practice standard for Prescribed Grazing (528) has been modified a number of times since 1997, which has led to more extensive planning requirements on the part of the planner. With the increased details or specifications of the practice, it became clear that a more systematic and organized method of capturing and processing information would be essential in meeting agency planning requirements. An Excel File, 528_spec_tool_R5a.xls, or “spec tool” has been developed to serve as a planning tool to capture and process data related to Grazing Lands. This Technical Note issues this planning tool along with instructions for use.

Filing Instructions:

This Technical Note and new Index will be filed electronically in the California eFOTG under the hierarchy: Section I, Technical Notes, Range <http://www.nrcs.usda.gov/technical/efotg>

Field Offices may also optionally file hard copies in three-ring binder with other “Subject” Technical Notes. If a hard copy is maintained, update the Index with new entries.
