CALIFORNIA TECHNICAL GUIDE
450- VI
Technical Guide Notice 70

SUBJECT: Reference Materials

Purpose: To transmit "*Recycling Municipal Trees*".

Effective Date: Effective Upon Receipt

Background: This publication was developed so that communities and others might become more aware of alternative strategies to divert wood products from the green stream other than chipping or co-generation when trees are removed for whatever reason in urban areas. The recycling of this woody material to sawlogs could potentially generate income and industry as well as reduce the costs involved in processing this material to chips or firewood.

This distribution exhausts the NRCS supply of the guide. No additional copies are available from NRCS. Additional copies may be ordered by following the ordering information on the last page of the guide.

Filing Instructions: Reference in the General Reference Section in Section 1 of the FOTG, and file in your FO Reference Library.

A handwritten signature in black ink that reads "Diane B. Holcomb". The signature is written in a cursive, flowing style.
