

NATURAL RESOURCES CONSERVATION SERVICE
STATEMENT OF WORK
SALINITY AND SODIC SOIL MANAGEMENT
CODE 610

These deliverables apply to this individual practice. For other planned practice deliverables, refer to those specific Statements of Work.

DESIGN (PLANNING REQUIREMENTS)

Deliverables

1. Complete documentation to support Colorado NRCS criteria and compatibility with other planned and applied practices.
2. Document the practice purpose(s) as identified in the conservation plan.
3. Provide a list of all permits the client is required to obtain.
4. Conduct criteria specific soil and water inventories and analyses required to develop the management plan.
5. Provide the client with written plans and specifications including sketches and drawings as applicable, which adequately describe the requirements to install the practice to meet the stated purpose and obtain any necessary permits. Develop plans and specifications in accordance with the Colorado Salinity and Sodic Soil Management 610, Conservation Practice Standard.
6. Complete a Colorado Salinity and Sodic Soil Management 610, Conservation Practice Job Sheet for each field or treatment unit.
7. Provide written certification that the design meets practice standard criteria and complies with applicable laws and regulations.
8. Provide design modifications during application, as required.

INSTALLATION

Deliverables

1. Conduct a pre-application conference with the client.
2. Verify that the client has obtained any required permits.
3. Provide application guidance as needed.
4. Facilitate and implement any required design modifications with the client and the original designer.
5. Advise the client and NRCS on compliance issues with all applicable Federal, state, tribal and local laws and regulations including NRCS policies, which become apparent during the application.
6. Certify that the application process and materials meet design and permit requirements.

CHECK OUT

Deliverables

1. Provide records of the extent of practice units applied.
2. Provide certification that the application meets NRCS standards and specifications and complies with all applicable permits.
3. Complete progress reporting.
