LEGEND

- Greater Sage Grouse Priority Areas for Conservation (PAC's)**
In Colorado, this is defined as areas of high probability of use (summer or winter, or breeding models) within a 4 mile buffer around leks that have been active within the last 10 years. (DOI, 2013 and CPW, 2014).
- Greater Sage Grouse Overall Range**
Encompasses all mapped seasonal activity areas within the species observed range (CPW, 2014).
- Gunnison Sage Grouse Overall Range & Priority Areas of Concern (PACs).**
In Colorado, PAC's are designated as critical habitat that includes the exclusion areas (DOI, 2014). Collectively, this is also defined as the area which encompasses all mapped seasonal activity areas within the observed range of a population of Gunnison's sage grouse (CPW, 2014).
