

Local Important Farmland for Town of South Windsor, Connecticut

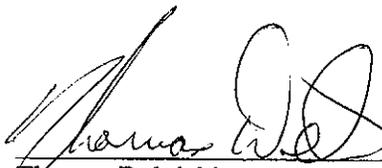

The Town of South Windsor, Connecticut, has concern for certain additional farmlands for production of food, feed, fiber, and forage, even though these lands are not identified as having national or statewide importance. According to the Code of Federal Regulations, title 7 part 657, these lands have been identified by the local agency concerned as *Local Important Farmland* and approved by the signatories below.

| Map Symbol | Soil Name |
|------------|---|
| 54B | Wapping very fine sandy loam, 2 to 8 percent slopes, very stony |
| 56B | Watchaug fine sandy loam, 2 to 8 percent slopes, very stony |
| 64B | Cheshire fine sandy loam, 3 to 8 percent slopes, very stony |
| 64C | Cheshire fine sandy loam, 8 to 15 percent slopes, very stony |
| 67B | Narragansett silt loam, 3 to 8 percent slopes, very stony |
| 67C | Narragansett silt loam, 8 to 15 percent slopes, very stony |
| 77C | Cheshire-Holyoke complex, 3 to 15 percent slopes, very rocky |

The undersigned hereby designate the above named soil mapunits as *Local Important Farmland* soils and officially add these soils to the list of Prime and Statewide Important Farmland soils for the Town of South Windsor, Connecticut.
