

315 – HERBACEOUS WEED CONTROL IMPLEMENTATION REQUIREMENTS

Name:	Farm No./Tract No.:
Address:	Field Number(s):
Assisted by:	Financial Assistance Program:
Date:	Contract Number:

Practice Purposes(s) (check all that apply)							
<input type="checkbox"/> To enhance accessibility, quantity, and quality of forage and/or browse. <input type="checkbox"/> To restore or establish native or other desired plant communities and wildlife habitats. <input type="checkbox"/> To protect soil and control erosion. <input type="checkbox"/> To reduce fine-fuels fire hazard and improve air quality.							
Associated Practices							
This practice may be applied alone or in combination with other supporting Delaware conservation practice standards. <input type="checkbox"/> The following practices are needed, and have been or will be implemented: (check all that apply) <table style="width: 100%; border: none;"> <tr> <td><input type="checkbox"/> Early Successional Habitat Developmt./Mgt. (647)</td> <td><input type="checkbox"/> Upland Wildlife Habitat Management (645)</td> </tr> <tr> <td><input type="checkbox"/> Forage and Biomass Planting (512)</td> <td><input type="checkbox"/> Wetland Wildlife Habitat Management (644)</td> </tr> <tr> <td><input type="checkbox"/> Prescribed Grazing (528)</td> <td><input type="checkbox"/> Other practices (specify):</td> </tr> </table> <input type="checkbox"/> No associated practices are needed.		<input type="checkbox"/> Early Successional Habitat Developmt./Mgt. (647)	<input type="checkbox"/> Upland Wildlife Habitat Management (645)	<input type="checkbox"/> Forage and Biomass Planting (512)	<input type="checkbox"/> Wetland Wildlife Habitat Management (644)	<input type="checkbox"/> Prescribed Grazing (528)	<input type="checkbox"/> Other practices (specify):
<input type="checkbox"/> Early Successional Habitat Developmt./Mgt. (647)	<input type="checkbox"/> Upland Wildlife Habitat Management (645)						
<input type="checkbox"/> Forage and Biomass Planting (512)	<input type="checkbox"/> Wetland Wildlife Habitat Management (644)						
<input type="checkbox"/> Prescribed Grazing (528)	<input type="checkbox"/> Other practices (specify):						
Practice Specifications							
Herbaceous Weed Control Layout							
<input type="checkbox"/> Practice location(s) is/are shown on the conservation plan map. Soil map is also included.							
Treatment Specifications							
Weed control methods: (check all that apply)							
<input type="checkbox"/> Mechanical treatment <input type="checkbox"/> Chemical treatment <input type="checkbox"/> Biological treatment							
Weed(s) to be controlled:							
Percent (%) weed cover before treatment:	Percent (%) weed cover after treatment (goal):						
Treatment requirements are provided as follows: (check one or both)							
<input type="checkbox"/> Instruction sheet(s) or other plans (attached) <input type="checkbox"/> Specifications as described in this worksheet							
Permit(s) required? <input type="checkbox"/> Yes <input type="checkbox"/> No							

**315 – HERBACEOUS WEED CONTROL
IMPLEMENTATION REQUIREMENTS**

Treatment Specifications (continued)					
Field(s) or Site No(s).	Area (Ac. or SF)	Weed Control Method & Treatment No.	Equipment, Materials, and Application Rates	Dates or Timing of Activity	Additional Instructions
<p>Environmentally sensitive areas (e.g., water courses, water bodies, wetlands) present on or bordering the project? <input type="checkbox"/> Yes (shown on attached map) <input type="checkbox"/> No</p> <p>Herbicide application setbacks and/or other water quality buffers needed? <input type="checkbox"/> Yes (shown on attached map) <input type="checkbox"/> No</p>					
<p>Erosion and Sediment Control Measures, Special Requirements, and Mitigation Measures, if applicable: (Describe and attach additional maps and other documentation, as needed.)</p>					
<p>Additional Recommendations/Notes:</p>					

315 – HERBACEOUS WEED CONTROL IMPLEMENTATION REQUIREMENTS

Operation and Maintenance (check all that apply)		
<input type="checkbox"/> Apply herbaceous weed control practices using approved materials and procedures. Comply with all local, state, and federal laws and ordinances.		
<input type="checkbox"/> Inspect the area after treatment to assess the effectiveness of weed control, and then at least annually thereafter, to the extent feasible. Following initial treatment, some regrowth, resprouting, or reoccurrence of weeds may be expected. As needed, use spot treatment of individual plants or areas needing re-treatment when weeds are most vulnerable to treatment procedures.		
<input type="checkbox"/> When chemical treatment is used:		
1. Anyone buying or using a restricted use pesticide must be certified by the Delaware Department of Agriculture (DDA). Anyone in the business of applying pesticides, either restricted use or general use, to the land or property of another must be certified and obtain a Pesticide Business License from the DDA;		
2. Read and follow label directions. Labels include requirements for mixing/loading, and application setbacks from wells, water courses, natural or impounded water bodies, wetlands, and other environmentally sensitive areas;		
3. Control livestock and human access based on the treatment methods applied and restrictions as listed on the chemical labels. Post signs, according to label directions and/or federal, state, and local laws, around fields that have been treated. Follow restricted entry intervals;		
4. Dispose of leftover herbicide and herbicide containers in accordance with label directions and adhere to federal, state, and local regulations;		
5. Maintain appropriate Material Safety Data Sheets (MSDS). MSDS and herbicide labels may be accessed at: http://www.cdms.net/LabelsMsds/LMDefault.aspx ;		
6. Calibrate application equipment according to recommendations before each seasonal use and with each major chemical and site change;		
7. Replace worn nozzle tips, cracked hoses, and faulty gauges on spray equipment;		
8. Maintain herbicide application records in accordance with USDA Agricultural Marketing Service's Pesticide Recordkeeping Program and state-specific requirements;		
9. Develop an emergency response plan for individuals exposed to chemicals, including telephone numbers and addresses of emergency treatment centers and the telephone number for the nearest poison control center. The National Pesticide Information Center (NPIC) telephone number in Corvallis, Oregon, may also be given for non-emergency information: 1-800-858-7384, Monday to Friday, 6:30 a.m. to 4:30 p.m. Pacific Time. The national Chemical Transportation Emergency Center (CHEMTRAC) telephone number is: 1-800-424-9300.
