

**422 – HEDGEROW PLANTING for POULTRY HOUSES  
IMPLEMENTATION REQUIREMENTS**

<b>Additional Specifications/Notes</b>		
<b>Operation and Maintenance</b>		
<p>Periodic management is needed to ensure successful implementation of this practice: (check all that apply)</p> <p><input type="checkbox"/> Inspect the hedgerow at least annually. If tree shelters are used, remove them before they impede the growth of the trunk. Removal should not occur until the seedling has adequate girth to support itself (usually 3 to 5 years after planting). Follow the maintenance recommendations in the attached fact sheet(s) for additional information.</p> <p><input type="checkbox"/> If survival is less than expected during the first two years, replant as needed to achieve the intended purpose of the practice.</p> <p><input type="checkbox"/> Shape and replant areas damaged by heavy rainfall, animals, chemicals, tillage, or equipment traffic, and any other areas where the vegetation is not adequate.</p> <p><input type="checkbox"/> Check for insects and diseases, and if an incidence threatens stand survival, take corrective action to keep the pest under control.</p> <p><input type="checkbox"/> Control undesirable plants by pulling, mowing, or spraying with a selective herbicide. Control noxious weeds as required by state law.</p> <p><input type="checkbox"/> Other requirements, or follow-up needed (describe):</p>
